

Customise your toolbox

Add new tools and features directly into SketchUp with hundreds of apps for rendering, drawing, productivity, energy analysis, and more.

Optimise your workflow

Browse our extensive library of third-party extensions developed to customise and enhance your modeling workflow. Extension Warehouse contains over 750 free and paid apps.

Apps on demand

Extension Warehouse is fully integrated with SketchUp Pro. You can download, install, and manage the apps you need from within the desktop client.

Designed for you

Many extensions solve specific drawing pain points or improve industry-specific workflows. Whatever you require, you'll find an app to get the job done.

Future proof

Teams of developers are constantly creating new ways to hack your workflow, boost productivity, and help you generate upgraded outputs.

Real or render?

Photorealistic renderings are just an extension away. Select from a wide range of rendering engines to suit your budget and bring your models to life in a new way.

Level up your skills

Model anything in just a couple of clicks — from rounded corners to pipes and windows. There are hundreds of productivity extensions to automate steps.

3D printing

Choose an extension that helps you model from scratch, or clean up existing projects for transition from screen to 3D printer.
