

Orbit on the move

SketchUp Viewer for Mobile gives you the power to view and share your portfolio on iOS and Android devices. Take advantage of Augmented Reality to place objects in a real-world setting.

3D on the go

Keep your portfolio in your pocket. With SketchUp Viewer for Mobile, you can access and showcase your files from any iOS or Android device.

Visualise in place

Place 3D models within a real-world environment on compatible Augmented Reality devices - ARKit (iOS) or ARCore (Android).

Tell the full story

Use native SketchUp Scenes and Layers to build a narrative. Present multiple design options, construction phases, and additional project details.

Intuitive navigation

Show your work off from the best angles using multi-touch gestures and editable section planes. Access key data, such as areas and volumes, with Entity Info.

Flexible storage

Accessing your work is easy! Load SketchUp models from 3D Warehouse, Trimble Connect, Dropbox, email attachments, or even a folder on your device.

Poetry in motion

Create a virtual tour of your project, tailoring the camera's field of view and speed. You control the viewing experience with SketchUp animations.

Immerse yourself in VR

Engage colleagues and clients in an experiential design review: a rich and powerful way to evaluate, coordinate, and communicate your design intent.

Perceive space

Understand a project better—both its challenges and successes. Get a real feel of how a space will work well before construction begins.

Multi-user collaboration

Host sessions with multiple collaborators located anywhere in the world. Present your design and talk stakeholders through complex spaces more easily.

Simple navigation

View your designs as virtual scale models, or step inside and walk around your creation at 1:1. Teleport quickly to any location in larger models.

Create a narrative

Use native SketchUp Scenes and Layers to tell the full story. Present multiple design options, construction phases, and additional project details.

Choose your weapon

SketchUp Viewer for VR is available for Oculus Rift, HTC Vive and Vive Pro headsets as part of the SketchUp Pro annual termed subscription.

Sightlines? Sorted

Need to review a project within context? No problem! Carry out line of sight studies with realistic points of view and variable eye-height.
