

SketchUp

V-RAY NEXT FOR SKETCHUP

Great renders made easy

V-Ray® Next for SketchUp brings great workflow optimizations & faster than ever rendering.

Quickly & intuitively create your next stunning visualization.

V-Ray Next for SketchUp features greatly improved workflow, making it easier and faster than ever to interact with your SketchUp scene, organize your assets, set up lighting, and render your best work. Next can now automatically analyze and optimize your renders for you and you can take advantage of many performance optimizations for both CPU and GPU rendering. Now compatible with SketchUp 2020.

WHAT'S NEW

Streamlined workflow

- Powerful asset management
- Deep SketchUp connection
- Efficient render controls
- New materials and textures

Scene Intelligence

- Automatic exposure and white balance
- Adaptive dome light

Optimized performance

- Faster rendering
- AI denoiser

NVIDIA RTX support

CHAOSGROUP
